The Averill Chemical Paint

IS BETTER THAN EVER.

Enlarged facilities and increased capital have enabled this company to produce the ingredients composed in their Paint of a better quality than ever before attained. Every ingredient in the Averill Chemical Paint will be the purest, and invariably subjected to chemical analysis, and rejected if not found up to standard.

This Paint is acknowledged, by all who have used it, to be the most

DURABLE, BEAUTIFUL AND ECONOMICAL

Paint for either Wood, Iron, Brick, Stone or Plaster. Not being affected by the atmosphere, it is suitable for all climates; **DOES NOT FADE, CHALK or PEEL OFF**, but **RETAINS ITS FRESHNESS and BRILLIANCY** for many years, and will last **MUCH LONGER** than the best Lead and Oil mixed in the old way.

THE BEST IS THE AVERILL CHEMICAL PAINT. BECAUSE

1ST. *It has been thoroughly tested* by chemists, and over 300,000 owners of residences throughout the United States, for the last eight years, and pronounced by them to be the most *durable* paint known.

2D. *For beauty and retention of color* it stands far ahead of any other. Buildings have been painted with it in part, and partly with the best of other paints, both in the interior and on the sea coast, and in no case has it been excelled for beauty or for permanency of color.

3D. *It is economical*, and its cost is no more than the best lead and oil, and being far more *durable* (it wearing about twice as long as the best of any other,) and *beautiful*, warrants the assertion that for a period of twenty years it will save the consumer fully 50 per cent.

4TH. *It is in liquid form and all ready for use.* Purest White, or any desired shade, can be obtained without subjecting the buyer to the annoyance of purchasing oil, pigments, coloring matter, dryer, &c. It is easily spread, flows freely from the brush, clings firmly to every substance that it may be applied upon. For wood, brick, iron, or for any painting purpose where durability, beauty and preservative properties are requisite, it stands unrivalled. Though composed of the most indestructible materials known to science, an analysis of the AVERILL CHEMICAL PAINT shows it to be (unlike lead and most of the other paints) free from poison. It will not blacken or discolor by the action of the sulphurous gasses so prevalent on our marshy rivers and coasts.

Science pays a tribute to the Averill Chemical Paint.

Prof. CHARLES F. CHANDLER, a Chemist of world-wide reputation (who has analyzed the Averill Chemical Paint), says:

In painting with paints used prior to the invention of D. R. Averill, pigments had to be purchased, coloring matter, oil, thinning agents, dryers—and varnish also, if gloss was desired—which made it very inconvenient and expensive; but with the Averill Chemical Paint an intimate mixture or emulsion is produced, and paint ready for application in small or large quantities can be purchased and used as occasion may require. I consider it a useful, permanent liquid paint, and the invention one of great value.

Prof. L. LANSZWEERT, of San Francisco, Cal., by far the ablest Chemist west of the Rocky Mountains, says:

Samples of Averill's Chemical Paint have been boiled, heated, frozen and pickled in alkalies and acids, and fumigated with foul gases. It has been boiled and then immediately placed on ice, so as to freeze whatever water might have been absorbed, and it has also been heated and then plunged into ice water, but without any sign of cracking or softening, superficially or otherwise. No other paint could stand these tests. *I am confident of its ultimately superceding the use of all other paints for external or internal application, either on stone, wood or metals.*

Prof. BENJAMIN SILLIMAN, a Chemist regarded as authority in scientific matters, (after making a thorough analysis and test of the Averill Chemical Paint,) says:

Its ingredients are metallic oxides, gelatinous silica, etc.; combined scientifically and in such a manner as will produce a liquid oleaginous paint, that from its nature must prove very elastic, as well as handsome and durable; and the invention of the Averill Chemical Paint I consider one of the most valuable and scientific known.

Prof. J. LANG CASSELS, one of the most thorough and scientific Chemists of the West, (after analyzing and testing the "Averill Chemical,") says:

That up to the time of the invention of D. R. Averill, such durable ingredients, so scientifically combined, were not to be found in paints. Having for a period of twenty years made frequent examinations of painting materials, and being conversant with their nature, I am prepared to say that the Averill Chemical Paint must give a hard and durable surface, that it will prove more elastic and not discolor like the ordinary lead paints and being permanently liquid and ready for use, leads me to pronounce it one of the most valuable discoveries ever made in this direction.

EXTRACTS FROM LETTERS.

Office of CHENEY BROS., Silk Manufacturers, }
South Manchester, Conn.

AVERILL CHEMICAL PAINT CO.—GENTS: During the past five years, we have used large quantities of your paint, and are convinced that it is *superior* to Lead and Oil. We do not hesitate to recommend it. Yours truly, CHENEY BRO'S.

PETER HENDERSON, Seedsman and Florist, New York, writes: I painted my residence with the Averill Chemical Paint, and, compared with painting that I had done with the best White Lead and Oil at the same time, I find that the Chemical Paint retains its color and gloss far superior to the Lead and Oil. In future I will use no other.

REV. W. W. BENNETT, Editor Christian Advocate, Richmond, Va., says: I have applied the paint purchased of you, and am very much pleased with it.

W. H. STEVENSON, Esq., Agent Mechanicsville Cotton Mills, Mechanicsville, N. Y., says: Your paint covers better, and wears longer than White Lead.

CHAS. J. ALGER, Attorney-at-Law, Burlington, Vt., writes: I have painted four buildings with the Averill Chemical Paint, and am so well pleased with their appearance, that in future I shall use no other.

SAML. HAMMOND, Boonton, N. J., writes: I was prejudiced against the Averill Chemical Paint, but was persuaded to try it. Three years ago, I painted my dwelling on Rockaway Avenue, with the Averill, and one year later my carriage house with the best American Lead, warranted perfectly pure, and to-day the Averill is as bright and glossy as when first put on, and the White Lead has faded, shows several shades of color, and has begun to chalk off. Anyone wishing to see a fair test can examine the two buildings and satisfy himself.

W. M. STEVENS, Boykins Depot, S. C., writes: Having been a painter for a great many years, I therefore consider that I am competent to judge about durability, quality, &c., of paints, and in this connection I freely pronounce your Chemical Paint to be far superior to any that I have ever used, &c.

LYMAN LEWIS, Esq., Westfield, Mass., says: I used some of the Averill Chemical Paint three years ago, and to-day it looks as firm, and is in as good condition as when first applied.

SISTER SUPERIOR, of the Institute of the Holy Cross, Crawfordsville, Ind., writes: It is the best card you ever had out here; every one stops to look at the paint, and to enquire what it is and where procured. The house just painted looks *beautiful*; several of our neighbors intend to use your paint. The green is also much admired.

F. C. PHELPS, Guilford, Ct., writes: After finishing painting my house and blinds two coats with Chemical Paint, I found I had used only \$22.00 worth, and had \$17.00 worth left over. If I had used White Lead and Oil, my bills would have been \$25.00 more. Your paint is all you recommend it to be, and my neighbors say I have the neatest painted house in town.

J. J. THOMAS, Esq., Editor of the "Country Gentleman," Union Springs, N. Y., writes: I find by each successive year's trial, that your paint is more durable, more economical, and in every way more satisfactory than any other which I have used.

MESSRS. MALSTER & DONNELL, Proprietors of the Columbian Iron Works, Baltimore, Md., write: It gives us great pleasure to bear testimony to the value of the Averill Chemical Paint, which is becoming deservedly popular. We have used it extensively both on wood and iron, and are convinced that it is the most durable and beautiful paint known.

BIDDLE INSTITUTE, Charlotte, N. C.
Please accept our testimonial of the great value of your paint. This Institute has saved \$150 by using it instead of Lead and Oil. As to its superior beauty and brilliancy, there can be no question.
REV. S. C. ALEXANDER.

A. J. SUGGS, Esq., Ripley, Miss., says: The paint I ordered of you in May last I am highly pleased with, and shall endeavor to introduce it here.

J. DEITRICH, Esq., connected with the Custom House at Velasco, Tex., writes: I painted the U. S. Rev. Yacht with the Averill Chemical Paint. I regard it as the *best* and *cheapest* paint that I ever saw or ever used,

J. R. PHILLIPS, East New Market, Md., says: We are all very much pleased with your paint, &c.

J. H. RUSSELL, Agt. Adams Express Co., Lewes, Del., says: The paint I ordered of you gives entire satisfaction. While it was being applied a very heavy rain fell upon it: but it did not wash it in the least.

REV. WM. T. SLEEPER, Sherman's Mills, Me., writes: I have used and examined the paint thoroughly. It is all and more than represented, and covers more surface than the same quantity of any other paint, and is by far the best and cheapest. can also recommend it above all other paints for quality, durability, and finish.

ST. AUGUSTINE, Fla.
GENTS: I painted the St. Augustine Hotel with your paint. Find it all you claim for it. And furthermore believe it to be superior to any paint I have ever seen.

E. E. VAILL, Proprietor.

NEWBURY, S. C.
Just one year ago, we gave you sample order for the Averill Chemical Paint, and had it applied to test it, against the prejudice of our painters, and it has stood the test so well, the writer has determined to paint his private residence with it. You will please therefore send us, &c.

S. P. BOOZER & CO.

Messrs. MAUK & DIEHL, Mechanicsburg, Pa., write: We think your paint the best we have ever seen. It has cost us less than one-half to paint with it, than it did the last time when we used lead. You may expect further orders soon.

Office of the CHESAPEAKE AND }
DELAWARE CANAL CO. }
Extract from report of John R. Price, Esq., Superintendent, to the Officers of the C. and D. Canal Co.

According to your instructions, I have carefully compared the cost and merits of the "Averill Paint" with White Lead, mixed with Oil ready for use, and find it *ninety-nine cents* per gallon in favor of the former. You will, therefore, please order for us, &c., &c.

ARE YOU GOING TO PAINT?

SELECT THE BEST.

The Averill Chemical Paint

IS OF THE

PUREST WHITE AND ANY DESIRED SHADE OR COLOR.

It Costs less, and will wear twice as long as the Best White Lead.

READY FOR IMMEDIATE USE—REQUIRES NO THINNING

AND SOLD ONLY BY THE GALLON.

A PAINT that will remain in perfect solution, MIXED READY FOR USE, and that can be purchased either in Pure White, Buffs, Drabs, Slate, French Greys or Brown, which will prove more DURABLE and far HANDSOMER than any other, besides costing less, and that can be applied by anyone who can move a brush, must meet with unprecedented success.

Such is the fact concerning the

AVERILL CHEMICAL PAINT,

and the *Press* throughout the country have so endorsed it. Read what they say:

N. Y. Independent: From personal use of the Averill Chemical Paint, we are well acquainted with its merits, and do not hesitate to express our cordial approval of it, and recommend it to the favorable notice of every householder in the land.

Christian Union: This company supply a long felt want. Farmers, and in fact *everybody*, can be their own painter, if necessary. Owners of hundreds of elegant residences, who are testifying to its merits, are a sufficient guarantee of its worth.

N. Y. Observer: The Averill Chemical Paint is no humbug. From our own experience we have no hesitation in recommending it as a paint that will stand.

The Methodist: It only requires general publicity to have its adoption and use become universal.

Liberal Christian: Some three years ago we applied the best "strictly pure" white lead to outside work, and at the same time some of the Averill Chemical Paint: to-day the white lead requires re-painting, while the Averill looks as white and glossy as when first applied.

Examiner and Chronicle: These paints are now becoming exceedingly popular, and we refer our readers, who may be in pursuit of a meritorious article, to the Averill Chemical Paint.

American Agriculturist: We have used it on inside and outside work; it spreads easily, has a good body, and a very beautiful appearance; and we recommend those who are going to paint to use it.

N. Y. Tribune: We would call the attention of persons about to paint their houses, barns, etc., to the Averill Chemical Paint. It is all ready for use, and of many beautiful shades. The numerous testimonials from persons of high respectability, many of whom are personally known to us, urge us to recommend it.

Moore's Rural New Yorker: This paint has been strongly recommended by our correspondents and other disinterested parties. Any amateur can use it without difficulty.

The Cultivator and Country Gentleman: We have found the Averill Chemical Paint to adhere better to all surfaces than any other paint. We have given these paints a full trial, and they possess all the merits claimed for them.

Phrenological Journal: This meritorious article, wherever it has been properly tested, has gained the heartiest expressions of approval.

Christian At Work: Its applicability for all purposes, and its durability is so well attested, that we unhesitatingly recommend our readers to give it a trial.

Recommends from all sections of the country, comprising the owners of many of the finest villas and residences in the land, can be obtained with FULL SAMPLE CARD and PRICE LIST, free of charge, by addressing

SEELEY & STEVENS,

General Agents for the Company,
